DETAILED ACTION

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the prior art fails to disclose, in combination with all the limitations and in light of the specifications that the instant stop command generation circuit generates a stop command to instruct the inverter to be stopped immediately when a value of the load current detected is compared to a threshold value and the load current exceeds the allowable threshold value and an overlap stop command generation circuit that performs a time interval operation for a time set in accordance with the value of an overload value when the value of the load current is compared with an overload value set at a value smaller than an allowable threshold value and it is detected that the load current exceeds the overload value and generates a stop command that instructs the inverter to be stopped when the time interval is completed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
